

Middle Years Entrepreneurship Education

Curriculum Content

Majority of jobs are created by small businesses started by entrepreneurially minded individuals, many of whom go on to create big businesses. People exposed to entrepreneurship frequently express that they have more opportunity to exercise creative freedoms, higher self esteem, and an overall greater sense of control over their own lives. As a result, many experienced business people, political leaders, economists, and educators believe that fostering a robust entrepreneurial culture will maximise individual and collective economic and social success on a local, national, and global scale. It is with this in mind that St. Mark's International School designs and develops an educational program for Entrepreneurship Education, with the aim to prepare our students to succeed in an entrepreneurial economy.

Entrepreneurship education is a life-long learning process. The curriculum and their supporting performance indicators are frameworks for our teachers to use in building appropriate objectives, learning activities, and assessments for our students. Adopting this framework, students will have progressively more challenging educational activities, experiences that will enable them to develop the insight needed to discover and create entrepreneurial opportunities, and the expertise to successfully start and manage their own businesses to take advantage of these opportunities.
